

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. Supplementary Tables are given, showing in detail the nature of the principal Imports and Exports of Foreign and Colonial Merchandise (pages 50, 51, 126, and 127) which are comprised under the headings "Goods Unmanufactured, Unenumerated," and "Goods Manufactured, Unenumerated," and of the principal Exports of British and Irish Produce comprised under similar headings (pages 80 and 81), together with the aggregate value for each description of article shown.

## N O T E.

---

In the tables contained in these Accounts, Imports are generally classified as received from the countries whence they were shipped direct to the United Kingdom. In the great majority of cases the country of shipment is also the country of origin; but it should be borne in mind that this is not always the case, and that to a greater or smaller extent merchandise, originating in one country, is credited in the tables to other countries at whose ports it has been transhipped, or through whose territories it has been conveyed by rail for shipment to the United Kingdom.

In particular cases in which this mode of classifying imports appears likely to give a seriously misleading idea of the real course of trade, efforts are made by the Customs Department, so far as possible, to attribute such imports to the actual countries of first shipment. It is not, however, possible to do this in all cases in the absence of "certificates of origin" of imported goods.

How far it has been found practicable in each instance to make the necessary adjustments in the returns will be seen from the following examples of the more important cases in which difficulty arises.

1. Countries such as Switzerland and Bolivia which have no seaboard do not figure in the returns at all. It has been found impracticable to distinguish Merchandise imported from these States, and such Merchandise is therefore credited to the country containing the port of shipment.

2. Large quantities of goods from Japan, China, and other Eastern Countries, are transhipped at Colombo. Other Eastern goods are transhipped at Marseilles. Goods from Chile and Peru are largely transhipped at Colon on the isthmus of Panama. In all these cases the goods are, so far as possible, credited to the country of original shipment instead of to Ceylon, France, or the Republic of Colombia, as the case may be.

3. A considerable amount of Canadian produce finds its way to the United Kingdom viâ the ports of the United States in winter, when many Canadian ports are closed by ice. To a limited extent produce from the United States is sent to the United Kingdom viâ Canadian ports, in the summer. Where, in such cases, the official documents enable a distinction to be drawn between Canadian and United States produce it is credited to the true country of origin. But, in many cases, such a distinction cannot be made, so that in using the statistics it should be remembered that a certain amount of the trade of Canada with this country, especially in winter, is unavoidably included under the heading "United States."

4. A considerable amount of the produce of Germany, Austria, and Switzerland finds its way to this country viâ Belgium and Holland. Some Russian produce comes through Germany, and a considerable quantity of Italian produce through Germany, Holland, Belgium, and France. Much West Indian produce is imported after transshipment at United States ports. In none of these cases has any correction of the returns been found possible, and the whole of the produce is credited to the country containing the port of shipment.

Exports are, as a rule, credited in the tables to the country of ultimate destination as declared by the exporters in their entries. Exports, however, to Switzerland and Bolivia, which possess no seaboard, are credited to the country in which the port of discharge is situated.

# ABSTRACT TABLES.

## TOTAL VALUE OF THE IMPORT AND EXPORT TRADE OF THE UNITED KINGDOM.

The values of the Imports represent the cost, insurance, and freight; or, when goods are consigned for sale, the latest sale value of such goods. The values of the Exports represent the cost, and the charges of delivering the goods on board the Ship, and are known as the "free on board" values.

† On April 19th, 1901, Coal, Coke, &amp;c., and Patent Fuel became subject to a Customs duty of 1/- per ton. Under the provisions of the "Finance Act, 1901," the duty on Manufactured Fuel was fixed at 90 per cent. of the Export duty on Coal. The net amount of the duty paid from that date to December 31st, 1901, was £977,256, and this amount of duty is included in the value.

‡ Products of Peat or Shale (including Naphtha, Paraffine, Paraffine Oil and Petroleum) were included, prior to 1901.

§ Included with "Cocoa or Chocolate, Ground, Prepared, or in any way Manufactured," prior to 1900. *See* page 91.

\* Sugar, and Articles containing Sugar or other Sweetening Matter, became liable to Duty upon importation on 19th April 1901. For convenience of comparison, the quantities and values of the free imports of Sugar, Molasses, and Glucose, in the years 1897 to 19th April 1901, have been withdrawn from Table No. 7 (Articles free of Duty), and are shown in this Table. In the year 1901, the imports free and dutiable are separately stated, and are bracketed together: the free imports, to 19th April, are expressed in the first line in the brackets, and the dutiable, imported after 18th April, in the second line.

† Imported prior to 10th June, 1901.

‡ Not separately recorded prior to 10th June 1901.
